

Scrum Software Applications for Business

Title: Scrum 2

Date: 5th Feb 2019

Member Name	Present Yes/ No
Adnan Ayub	Yes
Ian Scully	Yes
Jonathan	Yes

Lab details:

What have you done?

- Developed Gantt Chart (and will keep updating)
- Created Burndown Chart (and will keep updating)
- Created tables for database

What are your goals?

- One of our goals was to add functionality of restricted access to the database by certain users (See problems below)
- Goal now is to fill in the columns for the database
- Start the UML

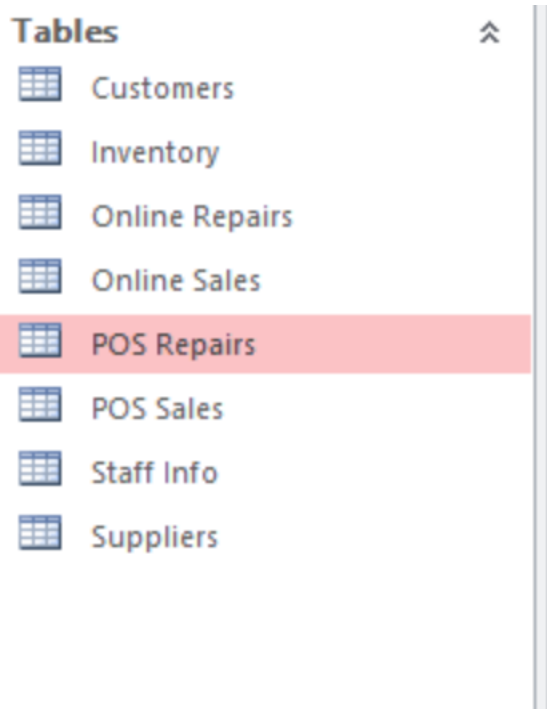

Problems/Challenges?

- Turned out not such a good idea, too difficult in principle, falling outside the scope of the project
- Not sure how to do the UML

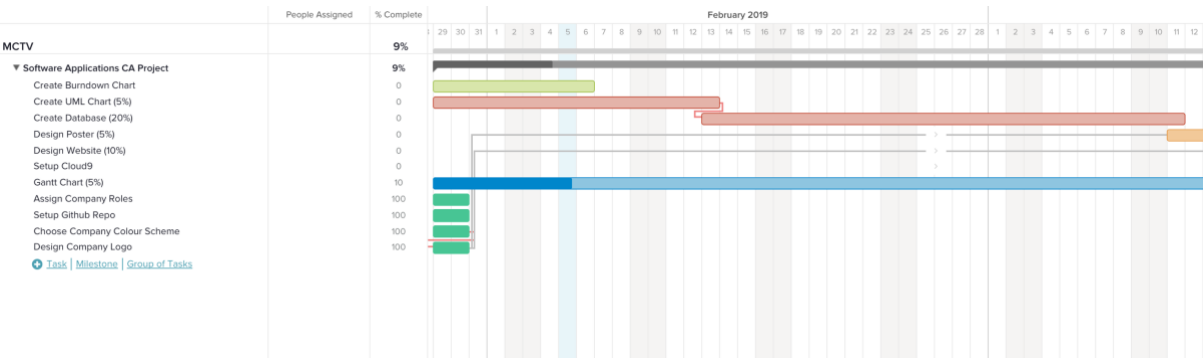

Screenshots

If any screenshots are needed insert them here and label as required.

Table for database

Gantt Chart setup

Burndown chart started
